Specifications

| Rated Power | Rated Voltage | Rated Current | Rated Frequency | Rated Speed | Cooling Method | Wiring Method |
|-------------|---------------|---------------|-----------------|-------------|----------------|--|
| 2.2kw | 220v/380v | 10A | 400Hz | 24000rpm | water cooling | Its Line 1,2,3 respectively connect with inverter line U,V,W line, Line 4 is grounded or not |

| Collet Nut | Collet(1-13mm) | Weight | Poles | Bearings | Lubrication method | Taper hole beating |
|------------|----------------|--------|-------|--------------------|--------------------|--------------------|
| ER20-A | 6mm | 5.75KG | 2 | 2*7002P4, 2*7005P4 | Grease | 2UM |

Product

Features

- 1) All our spindles adopt four pcs of 7 series P4 bearings, with good quality and long working life
- 2) Application: Milling, Engraving, Cutting, Carving, Drilling in all kinds of CNC Router Machine
- 3) Head of the spindle has dustproof and waterproof cover to protect spindle away from water and dust, which will prolong the service life of spindle.
- 4) Every spindle motor must be passed polishing process, improve spindle concentricity to increase motor working life
- 5) H20 aviation plug, dustproof and waterproof.
- 6) There are SQD series water cooling spindle, FQD series air cooling spindle with CE certificate for your choose.
- 7) Patented design, much more professional.
